

Comprehensive  
electrical and  
HVAC services for  
the mining sector.

# Welcome to Progrid

## Integrated services to support your mining operations

Progrid offers a full suite of services tailored to meet the unique demands of the mining sector. Whether you're in construction, production, or shutdown mode, our teams are ready to support with safe, efficient, and fully compliant delivery.

## Electrical Services

Delivering reliable electrical infrastructure and maintenance solutions to keep operations powered, compliant, and efficient.

## Precision Maintenance

Proactive, detailed maintenance that extends equipment life and reduces unplanned downtime.

## HVAC Services

Specialist HVAC system design, install, and servicing for industrial and remote environments.

## Communications, CCTV & Dry Fire

Robust communication systems to support safety, productivity, and remote site coordination.

## Labour Hire Services

Access to a qualified, experienced workforce to meet your project schedule and compliance needs.

A photograph of an industrial site, showing a large metal structure, possibly a conveyor system or part of a mine, under a clear blue sky. The structure is made of dark metal and has a grid-like pattern. A blue and white striped ribbon is tied around one of the vertical supports.

Our team are well-positioned to deliver specialised Electrical and HVAC services, supporting construction and mining projects across Western Australia.

We understand the operational environments, safety systems, compliance, and production pressures that are unique to the resources sector.

## ABOUT US

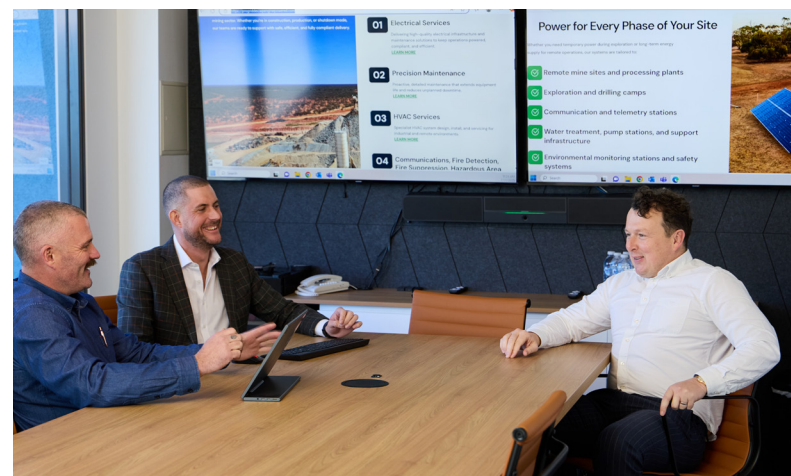

# Progrid is your trusted partner for electrical & HVAC construction, shutdown, and maintenance projects in Western Australia.

Progrid is a Western Australian provider of comprehensive electrical and HVAC services supporting construction and mining projects across Western Australia.

We are your trusted partner for construction, shutdown, and maintenance projects with a focus on delivering safe, reliable, and professional service.

Our workforce consists of highly skilled and qualified experts who understand the complexities unique to the resources sector.

With extensive industry knowledge and a deep understanding of safety, compliance, and scheduling requirements, we're committed to delivering construction and maintenance solutions that are delivered on time, within budget, and with minimal disruption to operations.

Our business is built on long-term partnerships, not transactional projects. We work best with clients who value:

- Clear communication
- Reliable delivery
- Professional conduct
- Repeatability and trust
- Safety-first alignment

Progrid is purpose-built for the following sectors

### Mining

Iron ore, lithium, gold, and nickel operations across WA.

### Industrial Construction

Regional infrastructure, utilities, and fabrication yards.

### Energy & Renewables

Emerging projects across hybrid power, microgrids, and transition infrastructure.

## Our Service Ethos

- Safety as a non-negotiable
- Professionalism on every front
- Quality as a core value
- Relationships that last, and built to last

At Progrid, our standard of service is what sets us apart. We operate with the mindset that every job is an opportunity to earn trust, not just complete a task.

## OUR SERVICES

### HV/LV installations Electrical Services (Construction & Maintenance)

Delivering high-quality electrical infrastructure and maintenance solutions to keep operations powered, compliant, and efficient.

1. HV/LV installations
2. Switchrooms, cabling, and automation
3. Hazardous area inspections
4. Ongoing maintenance and repairs

### Precision Maintenance

Proactive, detailed maintenance that extends equipment life and reduces unplanned downtime.

1. Predictive maintenance planning
2. Equipment diagnostics and inspections Hazardous area inspections
3. Documentation and reporting
4. Component replacement and upgrades

### Communications, CCTV & Dry Fire

Robust communication systems to support safety, productivity, and remote site coordination.

1. Data and fibre cabling
2. Wireless comms infrastructure
3. CCTV, security and access control
4. Ongoing network servicing and upgrades

### HVAC Services

Specialist HVAC system design, install, and servicing for industrial and remote environments.

1. Air conditioning for camps, switchrooms and facilities, cabling, and automation
2. Mechanical ventilation and extraction
3. DDC and BMS integration
4. Preventative and corrective servicing

### Progrid Underground Division

Specialised electrical services across the Western Australian Goldfields, supporting mining operations with safe, reliable, and production-driven outcomes.

1. Underground Electrical Infrastructure and HV/LV Distribution
2. Drill Rig Maintenance
3. Dewatering Systems
4. Underground Workforce Solutions

### Labour Hire Service

Access to a qualified, experienced workforce to meet your project schedule and compliance needs.

1. Fully ticketed electricians, technicians and supervisors
2. FIFO and metro crews
3. Short-term, long-term, and shutdown-ready teams
4. Seamless integration with your safety systems

### Backed by MECS Group

Progrid is part of the MECS Group, one of Western Australia's most trusted industrial services groups. MECS has a strong reputation for delivering mechanical electrical, automation, HVAC, and control solutions across complex projects.
